About

I build QA systems, testing processes and automation frameworks that raise quality, cut risk and speed up time to market. Strongest in FinTech, Blockchain, crypto (TON, Solana) and AI products. Manual and automated testing, cross-functional teams of up to 12 engineers; I look at development and testing through business value.

Currently going deeper into DevOps and Application Security: CI/CD, infrastructure and security testing are already part of my work. I work remotely and travel the world with my dog.

OPEN TO

Technical Manager IT Manager Head of QA QA Lead Senior QA Engineer
DevOps / AppSec – open to a lower grade

Full-time or part-time • remote • any time zone

Strengths

- **QA from scratch**
processes, team and automation for FinTech and crypto
- **Test strategy**
real product risks covered with tests, not reports
- **Backend QA for FinTech**
ledger integrity, idempotency, sagas
- **AppSec**
API vulnerabilities, access control, data handling
- **Teams**
hiring, processes, growing people
- **AI adoption**
AI agents and internal AI tooling

Toolbox

Python Java Pytest JUnit
Pydantic Gherkin Selenium
Appium REST Assured Postman
GraphQL Kafka SQL MongoDB
GitLab CI/CD GitHub Actions Jenkins
Docker Kubernetes Helm
Terraform JMeter Locust
Yandex.Tank Burp Suite Nmap
Allure n8n TON Solana

Experience

2GIS QA Lead

Mar 2025 – Oct 2026

Moscow • team of 9 Manual & Automation QA

- Led a QA team of 9 engineers; owned hiring, onboarding, performance reviews and growth
- Defined quality strategy and drove QA process improvements with engineering and product metrics
- Owned QA backlog prioritization, execution planning and cross-team release coordination
- Introduced security testing practices into QA workflows
- Drove AI adoption across engineering: R&D of AI-powered internal tools and AI agents
- Ran workshops, training and talks on AI; promoted AI-driven engineering culture

AI Agents QA Management SDLC Scrum Security Testing Metrics-Driven Management

Blum QA Lead

Feb 2024 – Mar 2025

Dubai • crypto trading platform & Telegram Mini App

- Built QA from scratch; established and scaled the QA team
- Defined test automation and quality strategy; built test infrastructure and CI/CD from the ground up
- Introduced quality control across the whole SDLC; owned releases and quality gates
- Performance and load testing of high-load distributed systems
- Security testing and vulnerability assessments; tested TON blockchain infrastructure

Python Pytest Pydantic Selenium GitLab CI/CD Kubernetes Helm Terraform JMeter Locust
Burp Suite TON

Wildberries Bank QA Lead → Team Lead

Apr 2022 – Feb 2024

Moscow • digital bank launch from day one

- Built QA and quality management processes from scratch; managed a QA team of 5
- Hired for QA and engineering roles; mentored and developed QA engineers
- Introduced test automation and CI/CD; owned releases and delivery quality
- Scrum Master for two product teams; led E2E integration testing and UAT

Java JUnit REST Assured Selenium GitLab CI/CD Docker SQL Scrum

Languages

Russian English Serbian

Education

Technology of Enterprise Development, Management

GASIS, HSE University, Moscow

VK Senior QA Engineer

Jun 2020 – Apr 2022

Moscow • Web, API and Mobile

- Built and maintained autotests for Web, API and Mobile; defined automation coverage strategy
- Planned testing of new features; took part in release management
- Functional, integration, regression and exploratory testing; requirements analysis

Java TestNG Cucumber Appium GraphQL Kafka MongoDB Allure Kibana

Tinkoff Bank QA Engineer

Feb 2018 – Jun 2020

Moscow • banking processing systems

- Tested banking processing and internal financial platforms; validated APIs and integrations
- Verified data consistency and database operations; wrote test documentation

Java Oracle PostgreSQL PL/SQL SoapUI Swagger

Mafin Project Manager

Oct 2016 – Feb 2018

Moscow • HR process automation

- Led HR automation initiatives; gathered and formalized business requirements
- Managed dev teams, backlog, timelines and budgets; bridged business and engineering

Projects

SOLO PRODUCT

SpeakMap

Map of places that serve you in your native language. Built solo, from backend to mobile app.

CRYPTO BANK

x.place

Testing from scratch, SDLC audit, critical vulnerabilities found.

WEB 3.0 • INVESTMENTS

J'Jo

Testing from scratch, working SDLC, autotest coverage.

UNDER NDA

Load & DDoS testing

Load testing and authorized DDoS attacks for clients.

MENTORING

QA for emigrants • solvery.io

QA training programs with a charity; QA mentor on solvery.io.
